# TALKING TRASH

**45 years strong!**

## **October is Breast Cancer awareness month!**

Help us in our effort to cure breast cancer with our **Pink Cart™** program.

# the pink cart™

## **DSI is on a mission to help CURB CANCER and we need your help.**

Consider a donation using one of these options.

### **Get a **Pink Cart™** and make a \$5 donation.**

For every **Pink Cart™** placed, \$5 goes to the American Cancer Society's breast cancer awareness program for every cart placed. Funds are directed to the local ACS Chapter located in Mendota Heights, MN.

### **Enroll in the DSI "Curb Cancer matching fund".**

The Curb Cancer matching fund allows you to add \$1 to your invoice and DSI will match it. The program is available with or without the **Pink Cart™**.

Your donation with our match will be given to the local Angel Foundation to support several programs.

Order a **Pink Cart™** from DSI and make a bold statement about cancer at your curb. You can learn more about the Angel Foundation at [www.mnangel.org](http://www.mnangel.org).

## **This month:**

- **Breast Cancer awareness month**
- **The **Pink Cart™** program**
- **CNG trucks**

**Next months newsletter...**

**Yard waste services are ending in November if you need yard waste removal, please call our office 952-469-2239**

# TALKING TRASH

**45 years strong!**

## **Construction has begun at DSI on a Compressed Natural Gas (CNG) Filling Station. Helping the environment, one truck at a time.**

Dick's Sanitation and Lakeville Sanitation (DSI/LSI) are proud to announce we have begun the process to build a Compressed Natural Gas (CNG) Fueling Station at our headquarters located in Lakeville. We are also adding 5 new CNG powered trucks to our fleet and removing 5 of the older diesel trucks. We expect the CNG fill station and the new CNG powered trucks to be operational in early 2012.

DSI/LSI will be one of Minnesota's first waste-recycling haulers to begin using this GREEN fuel in its collection fleet. This exciting news will produce many benefits. CNG trucks emit 23% less smoke and pollutants into the air compared to diesel trucks, the

CNG trucks will run quieter than our current diesel trucks which means we will emit less noise pollution in the communities we serve.

Natural gas is produced domestically and estimates have been made that we currently have over 120 year supply in the U.S., so we reduce our dependence on foreign oil.

This investment is just another way we LIVE GREEN here at DSI/LSI.
